Skills and Abilities

Programming Languages: Java, Python, C++, C#, MIPS Assembly (R3000), Racket, SWI-Prolog, SQL, HTML, CSS

Tools: Hugging Face, Git, Visual Studio Code, PCSpim, Godot Engine, UNIX/Linux

Languages: English (Native), Chinese (Native), Japanese (Intermediate), Spanish (Beginner)

Education

Saint Louis University

Saint Louis, MO

Bachelor of Science in Computer Science; GPA: 3.66/4.0

May 2026

- **Extracurriculars/Honors:** Open Source with SLU (OSS), Dean's List, SLU Esports, HackSLU, IEEE, eHacks 2024 Winner 🏆
- **Relevant Courses:** Software Engineering, Algorithms, AI/ML, Networking, Databases, Operating Systems

Software Engineering Experience

Bookmark! - Affordable Textbook Finder 🔄

August 2025 - December 2025

Python, Flask, Socket.IO, Docker

- Worked as a Software Engineer within a Agile Scrum environment to build a full-stack web app that finds the lowest textbook prices by converting titles to ISBNs via Google Books API and aggregating multiple retailers.
- Designed a pluggable scraper architecture and REST APIs, enabling easy addition of new data sources.
- Implemented real-time search updates with Socket.IO and deployed a Dockerized application with CI testing.

TankBattle - Real-Time Multiplayer Game 🔄

August 2025 - December 2025

C#, .NET 8, Unity, UDP

- Building a real-time multiplayer tank game (C#/.NET 8 + Unity) with a custom UDP network layer, including reliable messaging, prediction, smoothing, and server reconciliation; ran at 60 Hz with 3-4 players
- Measuring and improving network performance (latency, jitter, packet loss, bandwidth); hit under 100 ms median latency and 60-80% less bandwidth vs full snapshots; tested with clumsy/tc and analyzed in Wireshark/Python.

OSS CI/CD Automation (Capstone) 🔄 Open Source with SLU

August 2025 - December 2025

GitHub Actions, DevOps

- Collaborated with a cross-functional team to build and maintain CI/CD pipelines for multiple student-led projects.
- Automated builds, testing, and deployment using GitHub Actions, improving reliability and reducing build times.
- Contributed externally to CDEvents, implementing Python scripts and GitHub Actions workflows for automated versioning, and successfully submitting and merging PRs to a production open-source repository. 🔄

Other Experience and Leadership

OSS CI/CD Automation Techlead 🔄 Open Source with SLU

Saint Louis, MO

SLU

December 2025 - May 2026

- Led a team of undergraduate capstone students through the full software development lifecycle, including architecture decisions, sprint planning, code reviews, and milestone tracking.
- Served as a technical and mentorship lead for an open-source CI/CD automation product, fostering collaboration, resolving technical blockers, and developing junior engineers.
- Maintained and evolved production-facing open-source tooling (GitHub Actions, CI/CD pipelines), emphasizing sustainability, documentation, and real-world usability.

Part-time OPD

Belleville, IL

Walmart

July 2024 - February 2025

- Processed 50+ online orders per shift with 98% accuracy using inventory management systems.
- Tracked order status, located items, and updated stock levels in real-time with handheld devices.
- Collaborated with team during peak hours to maintain organized workflow and meet deadlines.

Part-time Cashier

Belleville, IL

China King

January 2018 - December 2024

- Served 100+ customers daily, managing \$2,000+ in cash transactions with zero discrepancies.
- Performed accurate cash drawer reconciliation and end-of-day operations over 7 years.
- Maintained food safety standards and inventory while preparing orders during peak hours.
